

Instructions for the Modified Installation of Statgraphics Centurion XVI Network Version

General Instructions

1. Software administrator privilege is needed to install the software.
2. KeyServer client software must be installed on the computer for the software to operate. You can check for KeyServer by accessing Start → All Programs → Sassafras K2 → Key Verify. A dialog box will identify a server under “Name” and Status as “Valid”. If there is no Sassafras K2 folder under All Programs, download either the current 32 or 64 bit version of K2Client appropriate to your computer from <http://www.tips.osmre.gov/Software/Downloads>. Follow the installation instructions posted on the webpage.
3. Backup any files from existing Statgraphics applications.
4. Uninstall any previous version of Statgraphics before installing this version.
5. Statgraphics will run on 32 or 64 bit systems in Windows OS.

Installation Instructions

1. Insert the Statgraphics Centurion disc into the drive. Browse to the disc and open the TIPS folder. The following files and folders should be displayed:
