

SDPS V 5.4 J

GENERAL INSTRUCTIONS

1. You must be logged in as Local Administrator to install SDPS. SDPS cannot be installed remotely from a server. If this is done, then a demo version will be installed that can be used for a limited number of times.
2. TIPS strongly recommends that you back-up your data before you begin the installation process.
3. If you have a previous version of SDPS installed you **must** remove it before installing version 5.4 J.
4. A reference manual and working examples can be found under the SDPS main menu – “View Manual”. Also ‘Help’ inside each module can be used to address specific questions. Adobe acrobat reader is required to read the manual.
5. KeyServer is required for this software to operate, please install KeyServer first, if you have not already installed KeyServer.
6. TIPS has provided a general installation shield which runs the SDPS install program. At the conclusion of the SDPS installation process, please wait for the TIPS installation sequence to finish, this may take a few minutes.
