

Generic Installation Instructions for ArcGIS 9.3.1 Update

Note: Click = Left Mouse Click

You must have ArcGIS version 9.3 already installed on your computer **BEFORE** you install this update of ArcGIS 9.3.1.

NOTE:

User must have Administrative Rights to the computer in order to install ArcGIS 9.3.1 Update. Check with your System Administrator if you are unsure of your permission settings.

ArcGIS 9.3.1 Update installs directly on top of ArcGIS 9.3.

ArcGIS 9.3 or 9.3 Service Pack 1 must be installed before you can install this Update. If you are unsure which products are currently installed on your machine, run the **PatchFinder931.exe** utility from the DVD on your local machine. This utility provides a report detailing which ArcGIS products are currently installed on your machine.

*If you have a version of ArcGIS prior to version 9.3 installed on your computer **STOP** here. If you wish to install the ArcGIS 9.3.1 Update you must uninstall all previous versions of ArcGIS, then install ArcGIS 9.3 before installing this ArcGIS 9.3.1 Update.*

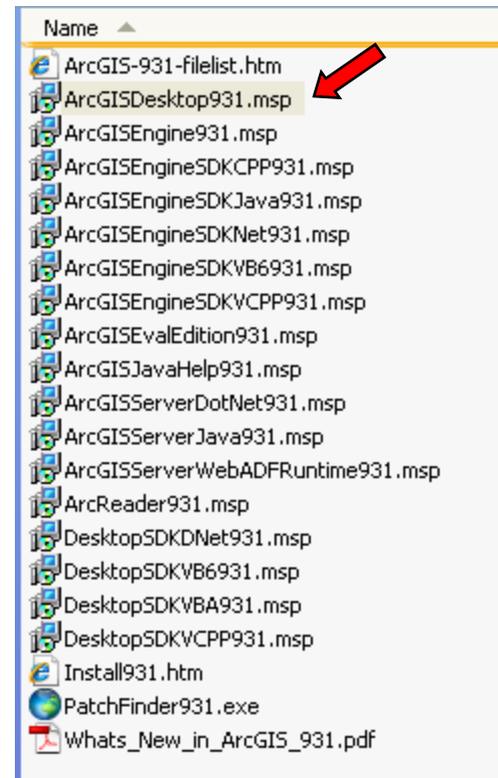

Step 1

Exit all Windows programs before starting the ArcGIS 9.3.1 Installation process!

Step 2

Insert the **ArcGIS 9.3.1 Update** DVD into your computer.

- Double-click on **ArcGIS Windows Folder**
- Double-click on **Install ArcGISDesktop931** to begin the installation process

The *Windows Installer* window will appear followed by the *Welcome to ArcGIS Desktop Setup* program window.

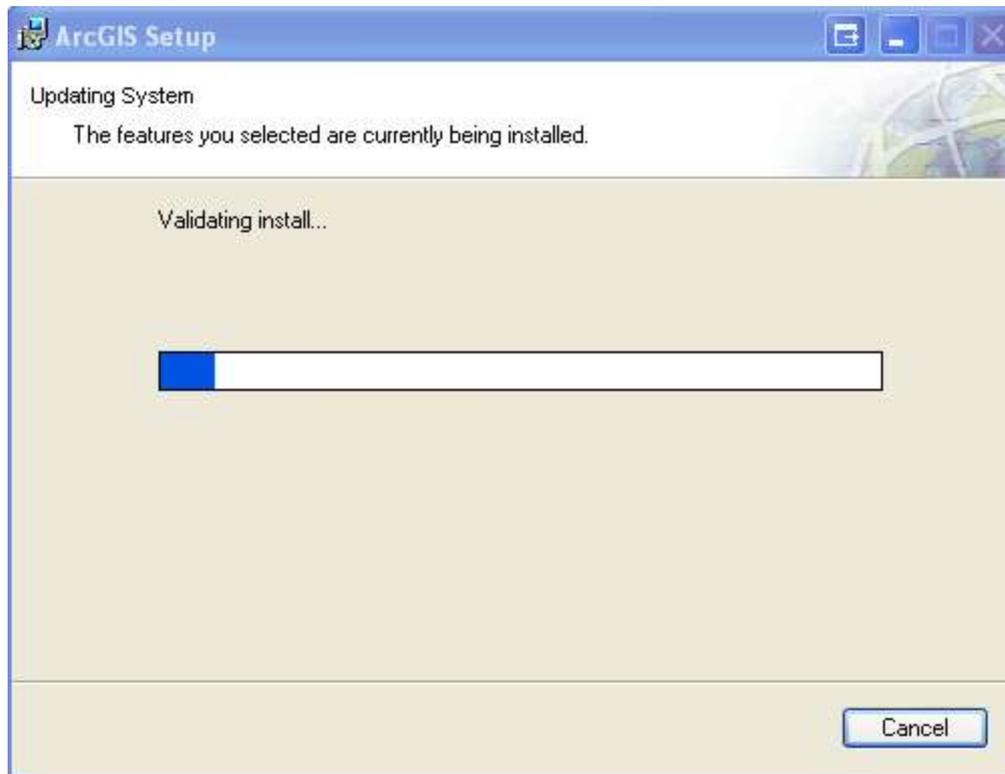

NOTE: It may take several minutes.

Click **Next** on the *ArcGIS Setup* window

The installation update will begin.

NOTE: This may take several minutes even if the Time Remaining says 0 seconds.

In the *ArcGIS Tutorial Data has been successfully installed* window

- Click **Finish**

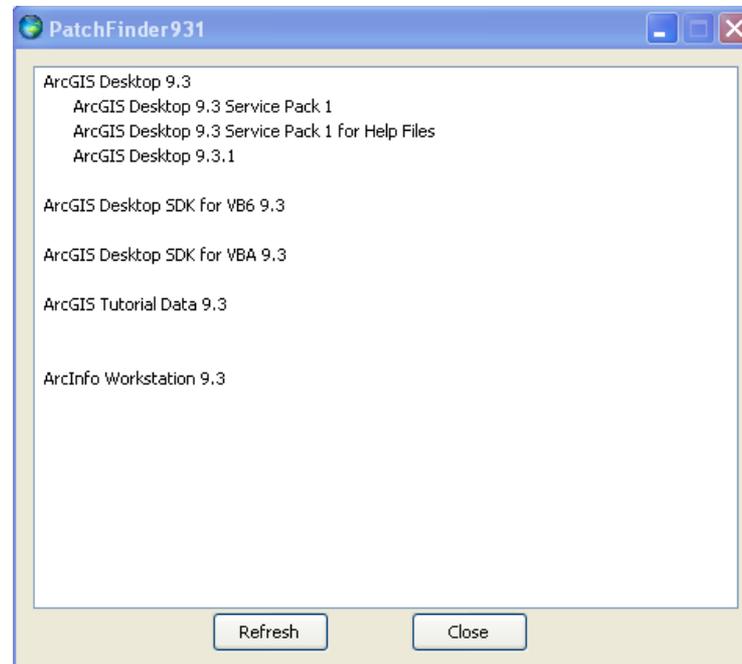

Step 3

With the **ArcGIS 9.3.1 Update** DVD still in the drive:

- Repeat Step 2 for each product installed on your machine.

NOTE: If you are unsure which products are currently installed on your machine, run the **PatchFinder931.exe** utility from the DVD on your local machine. This utility provides a report detailing which ArcGIS products are currently installed on your machine.

**Example only:
Your report may look different.**

Step 4

Remove the **ArcGIS 9.3.1 Update** DVD from your computer.

The End
