

FLIR One Thermal Camera

The FLIR One Thermal Camera is a small, very lightweight thermal imaging camera that attaches to the charging port of the user's Android or iOS mobile device. The FLIR App is then used to capture thermal imagery and temperature, which is useful in multiple applications such as mine fires investigations and discovery of water seeps from mine impoundments.

The System Includes:

- FLIR One Thermal Camera w/ case and charging cables

Uses:

- Capture thermal images on your mobile device
- The mobile device should have FLIR One App installed.

Maintenance:

- Device needs charged prior to use
- Mobile device not included

Check out Contact information:

This unit is available from the technical services branch of the Mid Continent Region of OSMRE in Alton, IL. Equipment is available on a case-by-case basis depending on demand. Some training on the use of the equipment and mobile software may be required depending on the user's experience level.
