

## **P620-660 Forward Looking Infrared (FLIR) Camera**

FLIR P-Series infrared cameras (P620, P640 and P660) provide superior thermal and visual image quality; spot size resolution, temperature measurement accuracy, and a host of advanced features will give you the best engineered, best infrared camera on the market today.

### **The System Includes:**

- Pelican case, charger, extra 15 degree and 45 degree lens, and capture software (one system). Shippable case.

### **Uses:**

The FLIR camera is used to determine areas on fire within mine refuse and underground mines. It can also be used on mine drainage problems as well as mine gas investigations.

### **Check Out Contact Information:**

The FLIR camera is available from the TIPS Services Branch of the Western Region. Please contact *Mike Benavides* at (303) 293-5062 or [mbenavides@osmre.gov](mailto:mbenavides@osmre.gov).
