

## Windows Seven Key Server Directions

- 1) Have the user log in as usual.
- 2) Download the key client to Desktop from the TIPS Downloads.  
<http://www.tips.osmre.gov/Software/Downloads.shtml>
- 3) Go to 32 or 64 bit install which Windows 7 installed on your workstation.
- 4) Right click and install as administrator
- 5) The rest of key client install should be normal like the original directions.
- 6) Note: Make sure you put the server name in the space provided. The proper server name to insert was provided by your TIPS Service Manager, or you can call Mike Benavides at the number below.
- 7) For the rest of the install take the defaults and reboot your workstation
- 8) Any problems call Mike Benavides at 303-293-5062.
