

MAPLEX

Maplex is a cartographic tool designed to facilitate text and label placement on your maps. Maplex automatically generates text placement that does not overlap and is in the most aesthetically pleasing position.

SELECTED FEATURES:

- Easily produce high quality labels
- Maximize available space with automatic placement
- Reduce time spent positioning labels

SOFTWARE:

ArcGIS Maplex

SMCRA BENEFITS/USES:

- Produce professional map products for many SMCRA applications
- Reduce time spent performing map production

TIPS TRAINING CLASSES:

- Introduction to ArcGIS for Mining and Reclamation
- ArcGIS Spatial Analyst for Mining and Reclamation
