

ARCGIS PUBLISHER

ArcGIS promotes the distribution of map documents to a wide range of potential users. This tool allows you to convert map documents to published map files (PMFs) which are viewed by ArcReader, a free application. With Publisher you have the option of shipping the PMFs with or without the source data.

SELECTED FEATURES:

- Easily distribute map documents
- Create interactive maps
- Ensure control and access to enterprise GIS data
- Build custom viewers

SOFTWARE:

ArcGIS Publisher

SMCRA BENEFITS/USES:

- Simple translation of spatial data from enterprise GIS users to non-GIS inspectors and permitting officials
- Ensure the appropriate data is provided when fulfilling request from the public

TIPS TRAINING CLASSES:

- Introduction to ArcGIS for Mining and Reclamation
- ArcGIS Spatial Analyst for Mining and Reclamation
